

Sentinel

Integrated Defense & Command Software Suite

Sentinel is One Defense's command-and-control software suite, fusing radar, EO/IR, and RF sensor data into a single real-time operating picture with a complete, auditable decision trail for base and fleet defense missions.

SPECIFICATION	DETAIL
Function	Sensor fusion, tracking, command & control
Sensor Inputs	Phased-array radar, EO/IR, RF
Architecture	Networked, mesh-redundant nodes
Decision Support	AI-assisted, human-in-the-loop
Audit	Full timestamped decision audit trail
Program Status	Operational testing
